U.S.-CHINA TRADE WAR

Economic Intelligence Analysis | Trade Flows, Industry Exposure & Supply Chain Shift

The U.S.-China trade war represents a significant shift in international economic relations, particularly following the introduction of tariffs in 2018. This project examines changes in bilateral trade flows, U.S. import dependence on Chinese commodities, and emergence of alternative trading partners. Using U.S. Census Bureau trade data and Power BI, the analysis explores how trade patterns evolved during the tariff escalation and subsequent years.

Research Question: To what extent did the U.S.-Chinese trade war coincide with changes in American import sourcing and global trade relationships?

DATA SOURCE: U.S. Census BUREAU & Bureau of Economic Analysis (BEA) | ANALYSIS: POWER BI | Daniel Lugo

U.S.–CHINA TRADE WAR

Executive Overview | Bilateral Trade & Sourcing Shifts | 2015–2024

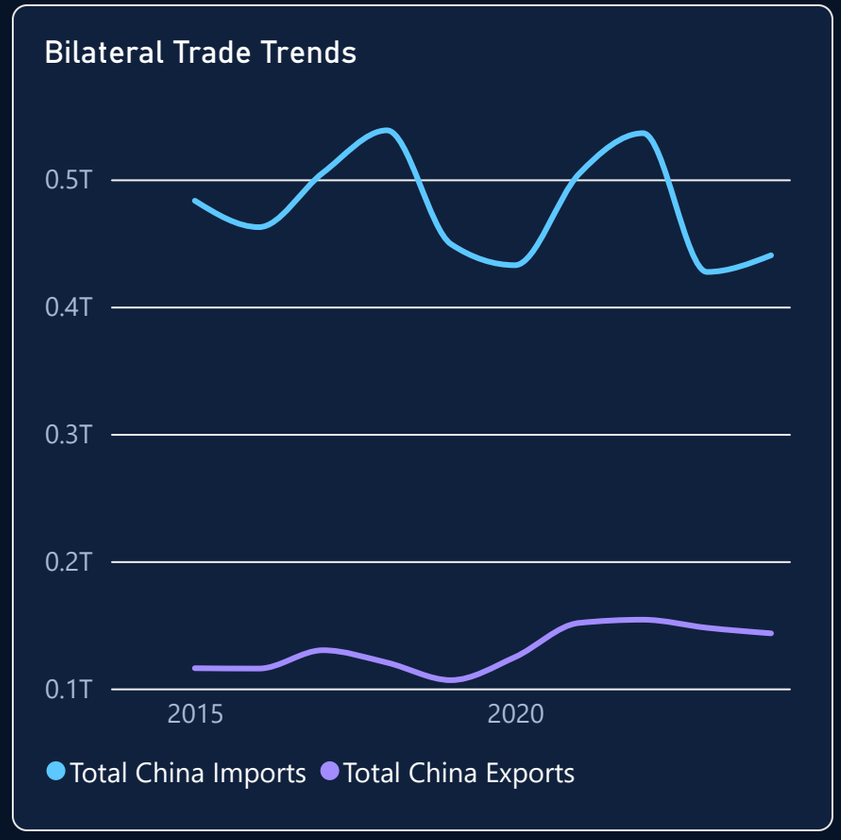

U.S. Imports from China	U.S. Exports to China	U.S.–China Trade Balance	China's Import Share
$4.78T	$1.31T	($3.47T)	18.00%

YEAR RANGE

Year

2015 2024

- **Trade imbalance:** U.S. imports from China substantially exceed exports over the selected period.
- **Trade volatility:** Bilateral trade values fluctuate across the observed years.
- **Strategic question:** Did the 2018–2019 tariffs accelerate U.S. sourcing diversification?

Industry Exposure & Trade Shifts

U.S. Imports from China by Commodity Category | 2015 - 2024

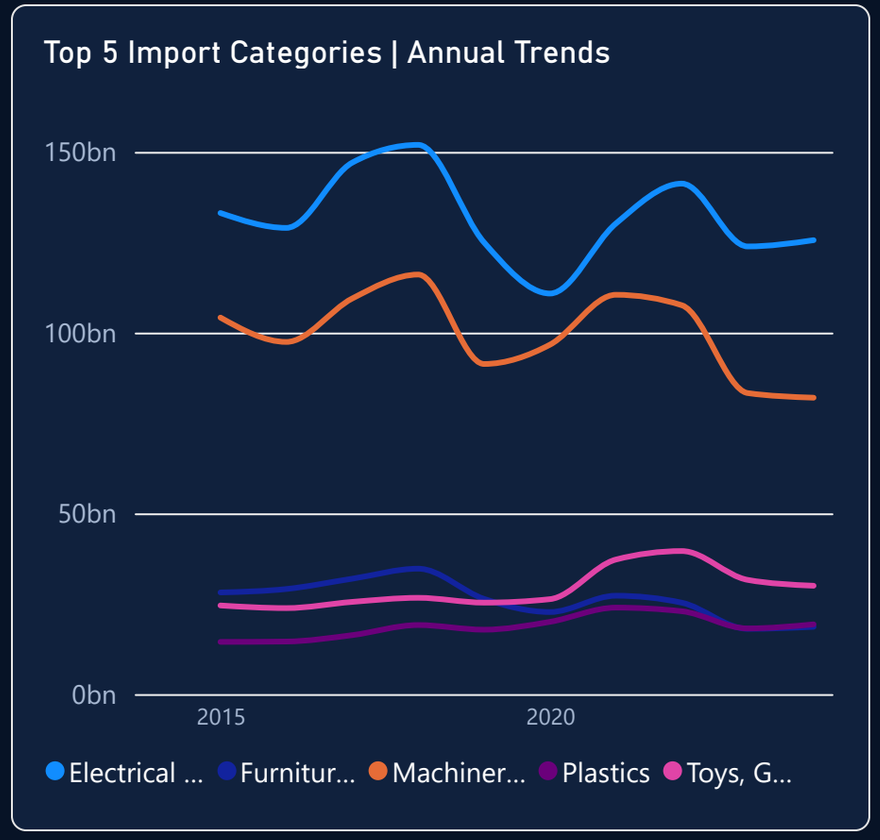

U.S. Imports from China	U.S. Exports to China	U.S.–China Trade Balance	China's Import Share
$4.78T	$1.31T	($3.47T)	18.00%

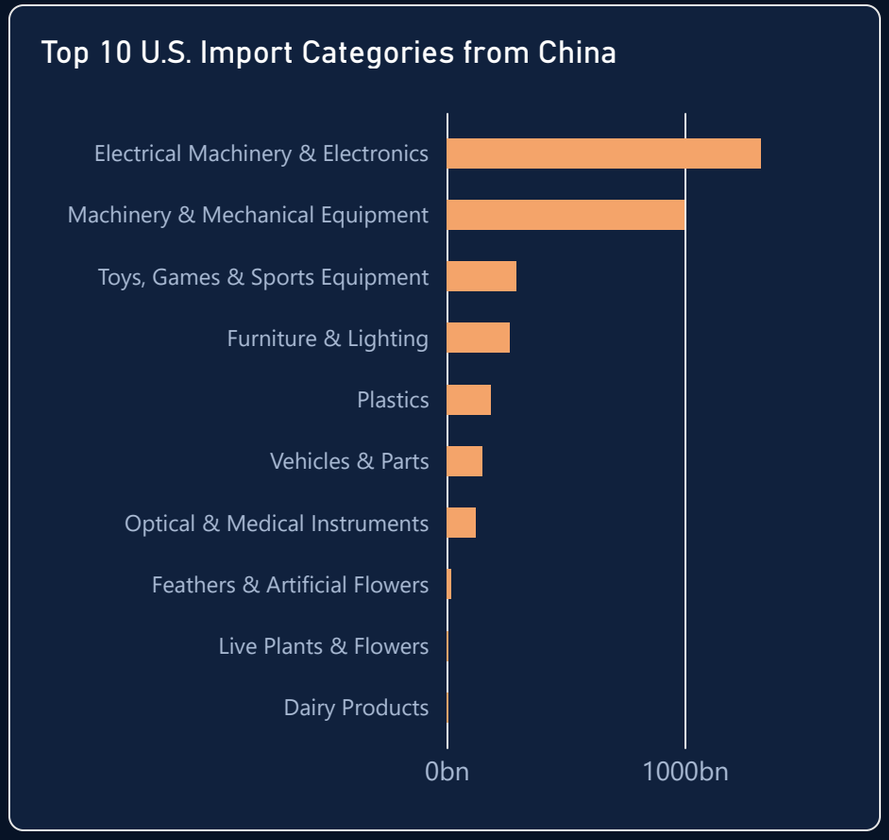

YEAR RANGE

Year

2015 2024

- **Import concentration:** Electronics and machinery dominate U.S. imports from China
- **Industry trends:** Major commodity categories show different changes over time.
- **Strategic question:** Did tariffs accelerate sourcing diversification after 2018?

Trade Diversion & Alternative Markets

U.S. Imports from Sourcing Patterns | China vs Alternative Suppliers | 2015 - 2024

Total U.S. Imports	China Import Share	Mexico Import Share	Vietnam Import Share
$27T	18%	14%	3%

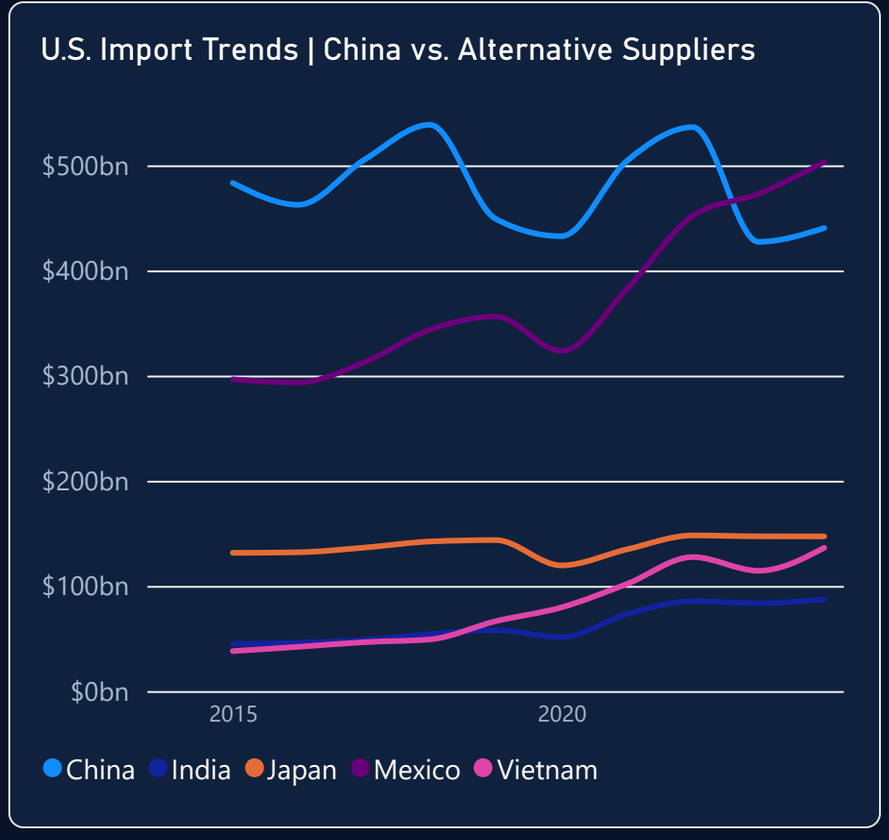

YEAR RANGE

Year

2015 — 2024

- **Supplier comparison:** China remains a major source of U.S. Imports.
- **Alternative markets:** Mexico, Vietnam, India, and Japan provide useful comparison for sourcing diversification.
- **Strategic question:** Did U.S. import sourcing shift toward alternative suppliers following the 2018 tariffs?

U.S.–CHINA TRADE WAR

Goods vs. Services | U.S.-China Trade Balance

U.S. Services Exports to China	U.S. Services Imports from China	U.S.–China Services Trade Balance	Services Share of Bilateral Trade
$500bn	$192bn	$308bn	10%

YEAR RANGE

Year

2015 2024

- **Service surplus:** U.S services exports to China exceed services imports
- **Trade composition:** Services account for approximately 10% of bilateral trade during the selected period
- **Trade balance:** Including services reduces the overall U.S.-China trade deficit but does not eliminate it.
